

Re: Wireless number portability

I am in favor of allowing customers to take their phone number with them.

With this ability, the companys must improve their service or there is no reason to stay with that company.

I use my cell phone for business and have a cell number that is very close to my land-line number

856 786-0397

609 706-0397

I am very dissatisfied with cingular service and would readily change if my present number would stay with me.

Where is any incentive to improve service if a cell company knows they have you locked in.

Better service elsewhere, isn't that what makes companies competitive.

Thank you
